Continuation of Substance of Interview including description of the general nature of what was discussed:

Examiner called Mr. Linder to discuss possibly expediting the prosecution of this case by canceling non-elected subject matter and limiting the fabric types. The Examiner noted that EP 442663 teaches various articles with one or more of the same polyoxometalates, so certain amendments would be needed to overcome the EP reference. No final agreement was reached as to how to amend to overcome said EP reference. A preliminary inquiry was made by Mr. Linder in expanding the elected subject matter to cover other possible values for X. In a subsequent telephone message left on the Examiner's voicemail on 6/9/2006, Mr. Linder asked whether it would be possible to have examined X = Si and Al in claim 58 instead of expanding to cover claim 59. The Examiner reserves decision on that request until the currently elected subject matter, i.e. X = P, is found allowable with respect to claim 58.
